? Actual Return - much too good. Let's see the real figures - what was the actual return for each year and how much did this cost the fund. Separate the general fund from the annuity fund. To protect the poorest workers only adjust the monthly pension for overpayments in the annuity. And if that brings someone below the ~~poverty~~<sup>1 1/2 times</sup> level don't do adjust them for annuity losses. Give people the option to repay the annuity to the general fund if they would rather have a pension to monthly check or whatever if you promise not to dilute the pension in the future. The only alliance between the old major cities

has helped to suck the lifeblood out of Detroit with the elected politicians of the state makes the future of Detroit and Michigan look bleak. The blood sucking will soon be sucking their own blood as there will be nothing left until the Chinese come in to suck, and perhaps contribute. From the politicians are no better than the banks who <sup>sold</sup> ~~baked~~ mortgages, or sold the CDO swaps; they do not look after the long term interests of society; but <sup>next</sup> their election or re-election and safety from threats when they don't take the rules.

9. Jones Day and his written the contracts that have been pushed thru the Detroit City Council since Kevin Orr was illegally appointed as emergency manager King of Detroit. Jones Day has given the rapists a big boost. Now the State of Michigan has entered an unholy alliance with the Mafia to restructure the city of Detroit.

Rizzo and their cousins from Florida (Advanced Disposal Services), have taken over ~~the~~ Detroit new <sup>(that our contract pays for but they ou</sup> garbage & their trucks go home to Steubenville each nite; instead of having mechanics, we were advised by Brown we now work for Kevin Orr to sell our truck at the end of the privatization contract of 5 years we

will be negotiating a new contract with  
the mafia who owns the means of production.  
Detroit is like Mexico. The drug dealers  
have money to launder and need legitimate  
businesses like garbage, produce, and corner  
front real estate to invest in and the state is  
helping them but not the city or the citizens  
of this city or the state. My world Anna  
Heller's laundry next to the Whittier get closed  
and when she tried to rent at the Jeffersonian  
they tell her 2 weeks for a credit check, then  
another 2 weeks to fix up an apartment to  
show her; she moved outside the city but did not  
want to and was happier in her old place. My guy

is the Prairie bus or wants the Jeffersonian.  
I helped a friend get out of Missouri with a  
masonry home into the old Cassiar Hall, and  
the managers have changed 3 times in 2 years  
as well as the building ownership changing frequently.

Recently the state legislature passed a  
law where they can padlock a building if drug  
dealers are found there, writing all the states  
8 people or more abstinent — the last  
were excluded from these enforcement rules.

Coll State Rep. Roscoe C. Robinson who voted  
against it.

9. It object to the representation of  
the retirees committee that was  
appointed and not elected by the people.  
~~With the retirement money they have~~  
totally neglected to stand ~~on principles~~

The general pension should not be  
touched except to adjust for unjust  
enrichment from the ~~annuity savings~~,  
and more importantly the workers should  
have the right to control ~~their~~ the  
management of their own pension, but  
with better disclosure requirements and  
without the obligation of the city to  
borrow money ~~to~~ to fund unfunded  
pensions; the workers should control the  
pension investment, not some corporate  
investor who want to invest in what  
helps their friends bottom line instead  
of the pensioners long term security.

We see corporate welfare in the Detroit  
Landbank, the Michigan Strategic Fund,  
the new proposed stadium that gives  
~~Illitch~~ the State of Michigan and the  
Downtown Development Authority advantages but  
does nothing for the general fund for all Detroiters  
garbage processing to like no land pink  
up every other week to make the demolition of DT  
more profitable for the demo companies ~~and~~

yard waste forced to paid for privately  
to a private company even in January.  
In the neighborhood organized crime is intens-  
ally destroying housing, pulling down porches  
making holes in roofs, removing bricks at the  
top level. This is not just my opinion  
but that of many. Our city will be made  
to conform to the Detroit Future Plan  
"by any means necessary."

69. Why off the plan so Dad and retirees are  
Class 7 rejects it, why should the person  
who made the bad plan, the emergency  
manager, be stipulated as the person to  
appoint a new committee. What is bad is the  
plans and contracts that the EMM and his  
law firm Jones Day have imposed on the city  
Council and we citizens so far are terrible already  
What are the 5 biggest beneficial Holders in class 7.

71. The purposes of a pension and vesting rights as to attract and retain good and loyal employees. When you terminate an employee's pension plan before he or she has worked enough work hours to get a vested pension by working the equivalent of 10 years, that ~~less~~ loyal worker is still making him or herself available and should be given the pension they have earned so far even though they are not yet vested. A ~~Payer~~ Leader from Clements told me he was told he was going to get \$23 a month so far for the ~~previous~~ year he has worked part time, but that was last year. This year he was told the pension system is changing and since he is not vested, he will receive \$1 a month now instead of the \$230 he had accumulated <sup>as of</sup> last year.

Other bad decisions made by the Governor who appointed the Board the corporate controlled legislature to privatize Detroit Public Safety, which never has only 5 employees left if they work in

The lamp room at \$72 an hour and less,  
Is made \$11.35 an hour in 1986 as a street  
light maintenance worker. They are changing  
the lamps that the previous director of  
PLD didn't ~~hadn't~~ been changed for 6 years  
<sup>Last summer</sup>  
and their life span is not usually more  
than 5 years. So to look like the  
EM is a savior and light the city,  
they kept PLD lamp room employee  
to put new lamps in Detroit  
Edison who we are paying to renew  
our assets has subcontracted with  
Lie Con<sup>sp</sup> to put new LED fixtures up  
that for \$1,100 a piece. The GE company  
salesman had 2 samples of ~~good~~<sup>139</sup> watt LED  
fixtures that are supposed to give out more

decreased to sodium vapor for only 13 watts. The mayor said the new LED had more watts and spread the light out more. The PLD lamp room workers say the LED fixtures spread the light out less. But for energy savings that would pay for themselves with lower bills from ~~State~~ DTE which buys most of its power off the grid instead of generating (which we could and should do until we can generate it), we could get LED fixtures with solar batteries and with photocells plug and plug ins, that can dim the lights after a certain time. Lights should be prioritized for the water sections and more later when we can afford an <sup>8.4</sup> MWT. Lights do not reduce crime & though people who make money off them would want to keep them lit, I think the City should turn the lights off at night.

could run between \$600 and \$800 but the  
mayor proposed \$60,000 rates should get a  
big discount, but will the general public  
realize the savings or will it be lost  
in kick backs between corrupt  
politicians and companies. Mayor <sup>is</sup> ~~was~~  
<sup>current</sup> on the Board of Directors for DTE.  
I believe. It was the State Legislature  
and Governor who voted for a lighting  
authority. ~~not~~ <sup>saying</sup> them to privatize  
our lighting and give more monopoly control  
to Detroit Edison. One of the major signs  
of Fascism like occurred in Nazi Germany  
was the lack of separation between government  
and the corporations. ~~there~~. And here they  
play on racism and financial ~~inservt~~ instead of  
anti-Semetic, anti-Communist, anti-Ashkenazi, etc.

Since I have been here and opened my eyes to the politics of Detroit and the ~~state~~ ~~was~~ ~~is~~ consider, I see the city being raped by the mafias and gangsters there is an unbreakable alliance between the Mafias, the state Government apparatus including the present Governor, the Michigan Stragers Board, the State Legislature, the Alex and Koch Bro. et al agenda, and those who want to play on racism to shore up their sinking finances by devoring Detroit, and trying to lie to a public who knows things could be better for all but haven't taken power yet to work this wonderful place for the benefit of the people who have already been driven out or those who would like to come back.

To pay on the 42,300,000 and what are the terms of the replacement bonds? Are we going from one bankruptcy to another until you eliminate all sources of revenue so that we are in perpetual debtors plus is that the reason why bankruptcy law is just credit card debt?
